

Cinnamomum burmani

Extract

The bark of the Cinnamon tree, is widely used as a spice in Food and in traditional Herbal medicines. Indonesia is the world's largest exporter of Cinnamomum and known for its superior quality.

Recent studies have found that high dose water soluble Cinnamon extract reduces blood sugar levels and improves insulin function in patients with type 2 Diabetes.

Latest research have also indicated its benefits as an antibacterial, control appetite, reduce body fat and controls blood pressure. This safe and natural extract is suitable for Nutraceutical preparations and Herbal supplements.

Phytochemindo water soluble Cinnamon extract is standardized and free of potentially harmful compounds that may be present in whole cinnamon.

Key active constituents: polyphenolic polymers, essential oils.

Being a native plant to Indonesia, Cinnamomum burmani extract is manufactured from select, high quality raw materials fresh from its source resulting in standardized extracts from our GMP certified extraction plant.
