

Nigella sativa *Extract*

Nigella sativa plant is a branched herb with white bluish flowers and capsule like fruits, filled with small black oval seeds (Jintan Hitam). Grown and widely used in Saudi Arabia and North Africa as a natural remedy for thousand of years.

Known as Habbat Al Barakah (seeds of good fortune), Habbatussauda, Black Seed, Jintan Hitam. Quoted in the Hadeeth books as,

“In the Black Seed there is healing of every illness except death.”

Since the last 20 years, studies have been made of the pharmacological actions and its high essential oil content.

Medicinal uses:

cardiovascular system, respiratory system, gastric ulcers, gall bladder, liver, kidney and immune system. The oil could be formulated to treat skin conditions such as inflammations, hemorrhoids, bacterial and fungal infections.

Phytochemindo's standardized dry and oil extracts offer a convenient way to apply as a Herbal supplement in tablets, soft capsules, ointments, creams and balms.

Key active constituents: polyunsaturated fatty acids (omega 3), alkaloids, saponins and minerals.

Phytochemindo's Nigella sativa extracts are manufactured in our fully GMP certified plant.

EXTRACT SPECIFICATION

PRODUCT NAME	NIGELLA SATIVA DRY EXTRACT	NIGELLA SATIVA OIL EXTRACT
BOTANICAL NAME	Nigella Sativa	Nigella Sativa
COMMON NAME	Habbat Albarakah Jintan Hitam	Habbat Albarakah Jintan Hitam
PLANT PART	Seed	Seed
PREPARATION TYPE	Extract Dry Concentrate Standardised	Extract Oil Concentrate Standardised
APPEARANCE	Brown powder	Brownish liquid
ODOUR AND TASTE	Characteristic	Characteristic
IDENTIFICATION	Positive by TLC	Positive by TLC
